STATEMENT OF MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL STATEMENTS

The Management of **ASA PHILIPPINES FOUNDATION, INC. (A MICROFINANCE NGO),** is responsible for the preparation and fair presentation of the financial statements, including the schedules attached therein, for the years ended December 31, 2018 and 2017 in accordance with the prescribed financial reporting framework indicated therein, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Foundation's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Foundation or to cease operations, or has no realistic alternative to do so.

The Board of Trustees is responsible for overseeing the Foundation's financial reporting process.

The Board of Trustees reviews and approves the financial statements, including the schedules attached therein, and submits the same to the members.

P&A Grant Thornton, the independent auditors appointed by the members, has audited the financial statements of the Foundation in accordance with Philippine Standards on Auditing, and in their report to the members, have expressed their opinion on the fairness of presentation upon completion of such audit.

Report on the Audit of the Financial Statements

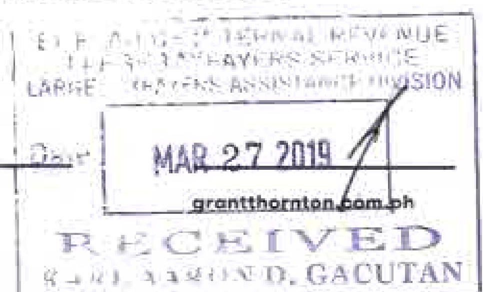
Opinion

We have audited the financial statements of ASA Philippines Foundation, Inc. (A Microfinance NGO) [the Foundation], which comprise the statements of financial position as at December 31, 2018 and 2017, and the statements of comprehensive income, statements of changes in fund balance and statements of cash flows for the years then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Foundation as at December 31, 2018 and 2017, and its financial performance and its cash flows for the years then ended in accordance with Philippine Financial Reporting Standards (PFRS).

Basis for Opinion

We conducted our audits in accordance with Philippine Standards on Auditing (PSA). Our responsibilities under those standards are further described in the *Auditors' Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Foundation in accordance with the Code of Ethics for Professional Accountants in the Philippines (Code of Ethics) together with the ethical requirements that are relevant to our audits of the financial statements in the Philippines, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.



Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with PFRS, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Foundation's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Foundation or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Foundation's financial reporting process.

Auditors' Responsibilities for the Audit of the Financial Statements

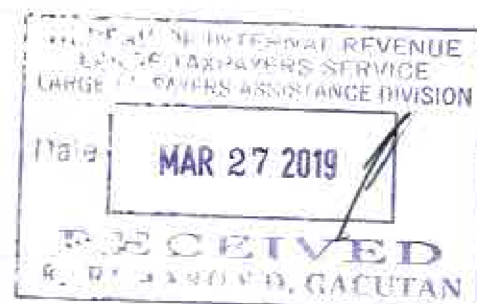
Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with PSA will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with PSA, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Foundation's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.



P&A Grant Thornton
An instinct for growth™

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Foundation's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Foundation to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on Other Legal and Regulatory Requirements

Our audits were conducted for the purpose of forming an opinion on the basic financial statements taken as a whole. The supplementary information for the year ended December 31, 2018 required by the Bureau of Internal Revenue as disclosed in Note 19 to the financial statements is presented for purposes of additional analysis and is not a required part of the basic financial statements prepared in accordance with PFRS. Such supplementary information is the responsibility of management. The supplementary information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

ASA PHILIPPINES FOUNDATION, INC. (A MICROFINANCE NGO)
(A Nonstock, Nonprofit Organization)
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2018 AND 2017
(Amounts in Philippine Pesos)

1. GENERAL INFORMATION

1.1 Foundation Information

ASA Philippines Foundation, Inc. (A Microfinance NGO) [the Foundation or ASA] was incorporated in the Philippines as a nonstock, nonprofit organization and registered with the Securities and Exchange Commission (SEC) on July 9, 2004. Its primary purpose is to provide access to economic and financial facilities, social and other developmental opportunities to the disadvantaged sectors including the small, cottage and micro-entrepreneurial poor of the community to fight against poverty, empowering them through self-employment and economic upliftment, so they may live with dignity, and to conduct microfinance operations pursuant to Republic Act (R.A.) No. 8425, *Social Reform and Poverty Alleviation Act.*

On August 29, 2017, the Foundation's Board of Trustees (BOT) and members approved the change in the corporate name of the Foundation from ASA Philippines Foundation, Inc. to ASA Philippines Foundation, Inc. (A Microfinance NGO). For this purpose, the Foundation's Articles of Incorporation and By-Laws was amended which was approved by the SEC on November 7, 2017.

The ASA Program provides:

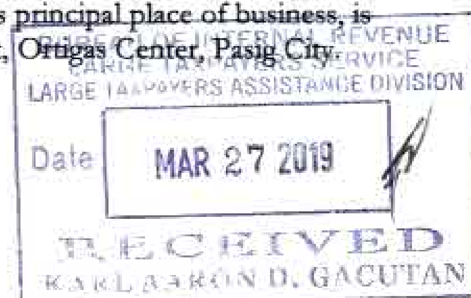
(a) Microfinance services to qualified poor, low-income women engaged in micro and small scale enterprises;

(b) Financial and other forms of assistance to its members in case of sickness, death and calamities and college scholarship for deserving children of members, as part of social services to the poor; and,

(c) Business development services for the members to improve efficiency and effectiveness in enterprise management.

As of December 31, 2018 and 2017, the Foundation has 1,150 and 1,000 branches, respectively, covering 82 provinces in the Philippines. Moreover, as of December 31, 2018, the Foundation has a total of 1,550 service points, which comprise of the branches, 117 extension units and 283 satellite units. The Foundation has established foothold in Luzon, Visayas and Mindanao, as it operates 590, 280 and 280 branches therein, respectively.

The Foundation's registered head office, which is also its principal place of business, is located at 15th Floor Prestige Tower, F. Ortigas Jr. Street, Ortigas Center, Pasig City.



1.2 Approval of Financial Statements

The financial statements of the Foundation as of and for the year ended December 31, 2018 (including the comparative financial statements as of and for the year ended December 31, 2017) were authorized for issue by the Foundation's BOT on February 28, 2019.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies that have been used in the preparation of these financial statements are summarized below. These policies have been consistently applied to all years presented, unless otherwise stated.

2.1 Basis of Preparation of Financial Statements

(a) Statement of Compliance with Philippine Financial Reporting Standards

The financial statements of the Foundation have been prepared in accordance with Philippine Financial Reporting Standards (PFRS). PFRS are adopted by the Financial Reporting Standards Council (FRSC) from the pronouncements issued by the International Accounting Standards Board, and approved by the Philippine Board of Accountancy.

The financial statements have been prepared using the measurement bases specified by PFRS for each type of asset, liability, income and expense. The measurement bases are more fully described in the accounting policies that follow.

(b) Presentation of Financial Statements

The financial statements are presented in accordance with Philippine Accounting Standard (PAS) 1, *Presentation of Financial Statements.* The Foundation presents all items of income and expenses in a single statement of comprehensive income.

The Foundation presents a third statement of financial position as at the beginning of the preceding period when it applies an accounting policy retrospectively, or makes a retrospective restatement or reclassification of items that has a material effect on the information in the financial position at the beginning of the preceding period. The related notes to the third statement of financial position are not required to be disclosed.

(c) Functional and Presentation Currency

These financial statements are presented in Philippine pesos, the Foundation's functional and presentation currency, and all values represent absolute amounts except when otherwise indicated.

Items included in the financial statements of the Foundation are measured using its functional currency. Functional currency is the primary economic environment in which the Foundation operates.

2.2 Adoption of New and Amended PFRS

(a) Effective in 2018 that are Relevant to the Foundation

The Foundation adopted for the first time the following PFRS and annual improvements to PFRS, which are mandatorily effective for annual periods beginning on or after January 1, 2018:

PFRS 9	:	Financial Instruments
PFRS 15	:	Revenue from Contracts with Customers; Clarifications to PFRS 15
Annual Improvements to PFRS (2014-2016 Cycle)		
PFRS 1 (Amendments)	:	First-time Adoption of Philippine Financial Reporting Standards – Deletion of Short-term Exemptions

Discussed below are the relevant information about these standards.

(i) PFRS 9, *Financial Instruments* (issued in 2014). This new standard on financial instruments replaces PAS 39, *Financial Instruments: Recognition and Measurement,* and PFRS 9 issued in 2009, 2010 and 2013. This standard contains, among others, the following:

- three principal classification categories for financial assets based on the business model on how an entity is managing its financial instruments, i.e., financial assets at amortized costs, fair value through profit and loss (FVTPL), and fair value through other comprehensive income (FVOCI);

- an expected credit loss (ECL) model in determining impairment of all debt financial assets that are not measured at FVTPL, which generally depends on whether there has been a significant increase in credit risk since initial recognition of such financial assets; and,

- a new model on hedge accounting that provides significant improvements principally by aligning hedge accounting more closely with the risk management activities undertaken by entities when hedging their financial and non-financial risk exposures.

The Foundation's new accounting policies relative to the adoption of PFRS 9 is fully disclosed in Notes 2.3 and 2.6.

Effective January 1, 2018, the Company applied PFRS 9 using the transitional relief allowed by the standard. This allows the Company not to restate its prior periods' financial statements. The adoption of PFRS 9 has not resulted in any adjustment in the opening balance of Retained Earnings.

However, the adoption of PFRS 9 has resulted in changes in the Foundation's accounting policies for recognition, classification and measurement of financial assets and financial liabilities and impairment of financial assets.

The adoption of PFRS 9 has not resulted to any adjustments to the carrying amounts of the Foundation's financial assets at the date of transition, because the Foundation's loans and other receivables remained to be accounted at amortized cost, and the application of the ECL methodology based on the stages of impairment assessment for loans and other receivables did not result in the recognition of additional allowance for credit losses as of January 1, 2018 [see Notes 2.3, 3.2(a) and 7].

Furthermore, the Foundation has no financial asset classified as FVTPL and FVOCI and, there were no changes to the classification and measurement of financial liabilities.

(ii) PFRS 15, *Revenue from Contract with Customers,* together with the *Clarifications to PFRS 15* (herein referred to as PFRS 15). This new standard replaces PAS 18, *Revenue*, and PAS 11, *Construction Contracts*, the related Interpretations on revenue recognition: International Financial Reporting Interpretations Committee (IFRIC) 13, *Customer Loyalty Programmes*, IFRIC 15, *Agreement for the Construction of Real Estate*, IFRIC 18, *Transfers of Assets from Customers*, and Standing Interpretations Committee 31, *Revenue – Barter Transactions Involving Advertising Services.* This new standard establishes a comprehensive framework for determining when to recognize revenue and how much revenue to recognize. The core principle in the said framework is for an entity to recognize revenue to depict the transfer of promised goods or services to the customer in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services.

The Foundation's significant source of revenue pertain to its microfinance activities, which generate interest income, are assessed to be out of scope of PFRS 15. This is presented as Service Fees in the statements of comprehensive income.

(iii) Annual Improvements to PFRS 2014-2016 Cycle. Among the improvements, PFRS 1 (Amendments), *First-time Adoption of Philippine Financial Reporting Standards – Deletion of Short-term Exemptions* is relevant to the Foundation but had no material impact on the Foundation's financial statements as these amendments merely clarify existing requirements. The amendments removed short-term exemptions in PFRS 1 covering PFRS 7, *Financial Instruments: Disclosures*, PAS 19, *Employee Benefits*, and PFRS 10, *Consolidated Financial Statements*, because the reporting period to which the exemptions applied have already transpired.

(b) *Effective in 2018 but are not Relevant to the Foundation*

The following amendments, interpretations and annual improvements to existing standards are mandatorily effective for annual periods beginning on or after January 1, 2018 but are not relevant to the Foundation's financial statements:

PAS 40 (Amendments)	:	Investment Property – Reclassification to and from Investment Property
PFRS 2 (Amendments)	:	Share-based Payment – Classification and Measurement of Share-based Payment Transactions
PFRS 4 (Amendments)	:	Insurance Contracts – Applying PFRS 9 with PFRS 4
IFRIC 22	:	Foreign Currency Transactions and Advance Consideration
Annual Improvements to PFRS (2014-2016 Cycle)		
PAS 28 (Amendments)	:	Investment in Associates – Clarification on Fair Value Through Profit or Loss Classification

(c) *Effective Subsequent to 2018 but not Adopted Early*

There are new PFRS, interpretation and amendments to existing standards effective for annual periods subsequent to 2018, which are adopted by the FRSC. Management will adopt the following relevant pronouncements in accordance with their transitional provisions; and, unless otherwise stated, none of these are expected to have significant impact on the Foundation's financial statements.

(i) PAS 19 (Amendments), *Employee Benefits – Plan Amendment, Curtailment or Settlement* (effective from January 1, 2019). The amendments require the use of updated actuarial assumptions to determine current service cost and net interest for the remainder of the annual reporting period after the plan amendment, curtailment or settlement when the entity remeasures its net defined benefit liability (asset).

(ii) PFRS 9 (Amendments), *Financial Instruments – Prepayment Features with Negative Compensation* (effective from January 1, 2019). The amendments clarify that prepayment features with negative compensation attached to financial instruments may still qualify under the "solely payments of principal and interests" (SPPI) test. As such, the financial assets containing prepayment features with negative compensation may still be classified at amortized cost or at FVOCI. Management is currently assessing the impact of this amendment in its financial statements.

(iii) PFRS 16, *Leases* (effective from January 1, 2019). The new standard will eventually replace PAS 17, *Leases*, and its related interpretation IFRIC 4, *Determining Whether an Arrangement Contains a Lease*. For lessees, it requires to account for leases "on-balance sheet" by recognizing a "right-of-use" asset and a lease liability. The lease liability is initially measured as the present value of future lease payments. For this purpose, lease payments include fixed, non-cancellable payments for lease elements, amounts due under residual value guarantees, certain types of contingent payments and amounts due during optional periods to the extent that extension is reasonably certain. In subsequent periods, the "right-of-use" asset is accounted for similar to a purchased asset subject to depreciation or amortization. The lease liability is accounted for similar to a financial liability which is amortized using the effective interest method. However, the new standard provides important reliefs or exemptions for short-term leases and leases of low value assets. If these exemptions are used, the accounting is similar to operating lease accounting under PAS 17 where lease payments are recognized as expenses on a straight-line basis over the lease term or another systematic basis (if more representative of the pattern of the lessee's benefit).

For lessors, lease accounting is similar to PAS 17's approach. In particular, the distinction between finance and operating leases is retained. The definitions of each type of lease, and the supporting indicators of a finance lease, are substantially similar to PAS 17. The basic accounting mechanics are also similar, but with some different or more explicit guidance in few areas. These include variable payments, sub-leases, lease modifications, the treatment of initial direct costs and lessor disclosures.

The Foundation will elect to apply the standard to contracts that were previously identified as leases applying PAS 17 and IFRIC 4 at the date of initial application. Management is currently assessing the financial impact of this new standard on the Foundation's financial statements.

(iv) IFRIC 23, *Uncertainty over Income Tax Treatments* (effective from January 1, 2019). The interpretation provides clarification on the determination of taxable profit, tax bases, unused tax losses, unused tax credits, and tax rates when there is uncertainty over income tax treatments. The core principle of the interpretation requires the Foundation to consider the probability of the tax treatment being accepted by the taxation authority. When it is probable that the tax treatment will be accepted, the determination of the taxable profit, tax bases, unused tax losses, unused tax credits, and tax rates shall be on the basis of the accepted tax treatment. Otherwise, the Foundation has to use the most likely amount or the expected value, depending on the surrounding circumstances, in determining the tax accounts identified immediately above.

2.3 Financial Assets

Financial assets are recognized when the Foundation becomes a party to the contractual terms of the financial instruments. For purposes of classifying financial assets, an instrument is considered as an equity instrument if it is non-derivative and meets the definition of equity for the issuer in accordance with the criteria of PAS 32, *Financial Instruments: Presentation*. All other non-derivative financial instruments are treated as debt instruments.

(a) Classification, Measurement and Reclassification of Financial Assets in Accordance with PFRS 9

Financial assets other than those designated and effective as hedging instruments are classified into the following categories: financial assets at amortized cost, financial assets at FVOCI and financial assets at FVTPL. Under PFRS 9, the classification and measurement of financial assets is driven by the Foundation's business model for managing the financial assets and the contractual cash flow characteristics of the financial assets.

Financial assets are measured at amortized cost if both of the following conditions are met:

- the asset is held within the Foundation's business model whose objective is to hold financial assets in order to collect contractual cash flows ("hold to collect"); and,

- the contractual terms of the instrument give rise, on specified dates, to cash flows that are solely payments of principal and interest on the principal amount outstanding.

All of the Foundation's financial assets meet these criteria and are measured initially at fair value plus transaction costs. These are subsequently measured at amortized cost using the effective interest method, less any impairment in value.

The Foundation's financial assets at amortized cost are presented in the 2017 statement of financial position as Cash, Loans Receivable, Other Receivables and Rental Deposits. Cash includes cash on hand and demand deposits, which generally earn interest at daily bank deposit rates and are subject to insignificant changes in value.

Interest income is calculated by applying the effective interest rate to the gross carrying amount of the financial assets, except for those that are subsequently identified as credit-impaired. For credit-impaired financial assets at amortized cost, the effective interest rate is applied to the net carrying amount of the financial assets (after deduction of the loss allowance).

The Foundation can only reclassify financial assets if the objective of its business model for managing those financial assets changes. Accordingly, the Foundation is required to reclassify financial assets: (i) from amortized cost to FVTPL, if the objective of the business model changes so that the amortized cost criteria are no longer met; and, (ii) from FVTPL to amortized cost, if the objective of the business model changes so that the amortized cost criteria start to be met and the characteristic of the instrument's contractual cash flows meet the amortized cost criteria.

A change in the objective of the Foundation's business model will take effect only at the beginning of the next reporting period following the change in the business model.

(b) *Classification, Measurement and Reclassification of Financial Assets in Accordance with PAS 39*

Financial assets are assigned to different categories by management on initial recognition, depending on the purpose for which the investments were acquired and their characteristics. Financial assets other than those designated and effective as hedging instruments are classified into the following categories: financial assets at FVTPL, loans and receivables, held-to-maturity investments and available-for-sale financial assets.

Regular purchases and sales of financial assets are recognized on their trade date. All financial assets that are not classified as at FVTPL are initially recognized at fair value plus any directly attributable transaction costs. Financial assets carried at FVTPL are initially recorded at fair value and the related transaction costs are recognized in profit or loss.

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They arise when the Foundation provides money, goods or services directly to a debtor with no intention of trading the receivables.

The Foundation's financial assets categorized as loans and receivables are presented as Cash, Loans Receivable, Other Receivables and Rental Deposits in the statement of financial position. Cash includes cash on hand and demand deposits which generally earn interest at daily bank deposit rates and are subject to insignificant changes in value.

Loans and receivables are subsequently measured at amortized cost using the effective interest method, less impairment loss, if any.

Non-compounding interest and other cash flows resulting from holding financial assets are recognized in profit or loss when earned, regardless of how the related carrying amount of financial assets is measured. Interest calculated using the effective interest method is recognized in the statement of profit or loss.

(c) *Impairment of Financial Assets under PFRS 9*

From January 1, 2018, the Foundation assesses its ECL on a forward-looking basis associated with its financial assets carried at amortized cost. Recognition of credit losses is no longer dependent on the Foundation's identification of a credit loss event. Instead, the Foundation considers a broader range of information in assessing credit risk and measuring expected credit losses, including past events, current conditions, reasonable and supportable forecasts that affect collectability of the future cash flows of the financial assets.

For debt instruments measured at amortized cost, the allowance for credit losses is based on the ECL associated with the probability of default of a financial instrument in the next 12 months, unless there has been a significant increase in credit risk since the origination of the financial asset, in such case, a lifetime ECL for a purchased or originated credit impaired, the allowance for credit losses is based on the change in the ECL over the life of the asset. The Foundation recognized a loss allowance for such losses at each reporting date.

The key elements used in the calculation of ECL are as follows:

- *Probability of Default* – is an estimate of likelihood of default over a given time horizon.
- *Loss Given Default* – is an estimate of loss arising in case where a default occurs at a given time. It is based on the difference between the contractual cash flows of a financial instrument due from a counterparty and those that the Foundation would expect to receive, including the realization of any collateral.
- *Exposure at Default* – represents the gross carrying amount of the financial instruments subject to the impairment calculation.

Measurement of the ECL is determined by a probability-weighted estimate of credit losses over the expected life of the financial instrument (see Note 4.1).

(d) *Impairment of Financial Assets under PAS 39*

As of December 31, 2017, impairment loss is provided when there is any objective evidence that the Foundation will not be able to collect all amounts due to it in accordance with the original terms of the receivables. The amount of the impairment loss is determined as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred), discounted at the financial asset's original effective interest rate or current effective interest rate determined under the contract if the loan has a variable interest rate.

The carrying amount of the asset shall be reduced either directly or through the use of an allowance account. The amount of the loss shall be recognized in profit or loss.

If in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized (such as an improvement in the debtor's credit rating), the previously recognized impairment loss is reversed by adjusting the allowance account. The reversal shall not result in a carrying amount of the financial asset that exceeds what the amortized cost would have been had the impairment not been recognized at the date of the impairment is reversed. The amount of the reversal is recognized in profit or loss.

(e) *Derecognition of Financial Assets*

The financial assets (or where applicable, a part of a financial asset or part of a group of financial assets) are derecognized when the contractual rights to receive cash flows from the financial instruments expire, or when the financial assets and all substantial risks and rewards of ownership have been transferred to another party. If the Foundation neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Foundation recognizes its retained interest in the asset and an associated liability for amounts it may have to pay. If the Foundation retains substantially all the risks and rewards of ownership of a transferred financial asset, the Foundation continues to recognize the financial asset and also recognizes a collateralized borrowing for the proceeds received.

2.4 Other Assets

Other assets pertain to other resources controlled by the Foundation as a result of past events. They are recognized in the financial statements when it is probable that the future economic benefits will flow to the Foundation and the asset has a cost or value that can be measured reliably.

2.5 Property and Equipment

Property and equipment are stated at cost less accumulated depreciation and amortization and any impairment in value.

The cost of an asset comprises its purchase price and directly attributable costs of bringing the asset to working condition for its intended use. Expenditures for additions, major improvements and renewals are capitalized while expenditures for repairs and maintenance are charged to expense as incurred.

Depreciation is computed on the straight-line basis over the estimated useful lives of the assets as follows:

Building	15 years
Equipment and vehicles	5 years
Furniture and fixtures	3 years

Office improvements are amortized over the estimated useful life of the improvements of five years, or the term of the lease, whichever is shorter.

The Foundation's property and equipment are subject to impairment testing whenever events or changes in circumstances indicate that the carrying amount may not be recoverable.

Impairment loss for property and equipment is recognized for the amount by which the asset's carrying amount exceeds its recoverable amounts which is the higher of its fair value less costs to sell and its value in use. In determining value in use, management estimates the expected future cash flows from such asset and determines the suitable interest rate in order to calculate the present value of those cash flows. The data used for impairment testing procedures are directly linked to the Foundation's latest approved budget, adjusted as necessary to exclude the effects of asset enhancements. Discount factors determined reflect management's assessment of respective risk profiles, such as market and asset-specific risk factors.

Property and equipment is subsequently reassessed for indications that an impairment loss previously recognized may no longer exist. An impairment loss is reversed if the recoverable amount of the property and equipment exceeds its carrying amount.

The residual values, estimated useful lives, and depreciation and amortization method of property and equipment are reviewed and adjusted if appropriate, at the end of each reporting period.

An item of property and equipment, including the related accumulated depreciation and amortization and any impairment losses, is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the item) is included in profit or loss in the year the item is derecognized.

2.6 Financial Liabilities

Financial liabilities, which include microsavings (composed of Capital Build-up [CBU] and Locked in Capital Build-up [LCBU]), loans payable and other liabilities (excluding tax-related liabilities), are recognized when the Foundation becomes a party to the contractual terms of the instrument. These are initially recognized at their fair value and subsequently measured at amortized cost using effective interest method for maturities beyond one year, less settlement payments.

All interest-related charges incurred on financial liabilities are recognized as expense in profit or loss as part of Project Costs under Expenses in the statement of comprehensive income.

Loans payable are raised for support of long-term funding of operations. This is recognized at proceeds received, net of direct issue costs. Finance charges, including premiums payable on settlement or redemption and direct issue costs, are charged to profit or loss on an accrual basis using the effective interest method and are added to the carrying amount of the instrument to the extent that they are not settled in the period in which they arise.

Financial liabilities are derecognized from the statement of financial position only when the obligations are extinguished either through discharge, cancellation or expiration. The difference between the carrying amount of the financial liability derecognized and the consideration paid or payable is recognized in profit or loss.

2.7 Offsetting Financial Instruments

Financial assets and financial liabilities are offset and the resulting net amount, considered as a single financial asset or financial liability, is reported in the statement of financial position when the Foundation currently has legally enforceable right to set-off the recognized amounts and there is an intention to settle on a net basis, or realize the asset and settle the liability simultaneously. The right of set-off must be available at the end of the reporting period, that is, it is not contingent on future event. It must also be enforceable in the normal course of business, in the event of default, and in the event of insolvency or bankruptcy; and must be legally enforceable for both entity and all counterparties to the financial instruments.

2.8 Provisions and Contingencies

Provisions are recognized when present obligations will probably lead to an outflow of economic resources and they can be estimated reliably even if the timing or amount of the outflow may still be uncertain. A present obligation arises from the presence of a legal or constructive obligation that has resulted from past events.

Provisions are measured at the estimated expenditure required to settle the present obligation, based on the most reliable evidence available at the end of the reporting period, including the risks and uncertainties associated with the present obligation.

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. When time value of money is material, long-term provisions are discounted to their present values using a pretax rate that reflects market assessments and the risks specific to the obligation. The increase in the provision due to passage of time is recognized as interest expense. Provisions are reviewed at the end of each reporting period and adjusted to reflect the current best estimate.

In those cases where the possible outflow of economic resource as a result of present obligations is considered improbable or remote, or the amount to be provided for cannot be measured reliably, no liability is recognized in the financial statements. Similarly, possible inflows of economic benefits to the Foundation that do not yet meet the recognition criteria of an asset are considered contingent assets, hence, are not recognized in the financial statements. On the other hand, any reimbursement that the Foundation can be virtually certain to collect from a third party with respect to the obligation is recognized as a separate asset not exceeding the amount of the related provision.

2.9 Revenue and Expense Recognition

The following are the specific revenue recognition criteria of the Foundation:

(a) *Service fees* – Service fees are recognized in profit or loss for the interest income on all instruments measured at amortized cost using the effective interest method. Unearned service charges is recognized during the month of disbursement and subsequently, earned as revenue, based on the effective interest method of accounting, as the loan is fully collected from the members.

The effective interest method is a method of calculating the amortized cost of a financial asset or a financial liability and allocating the income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash flows through the expected useful life of the financial instrument or a shorter period, where appropriate, to the net carrying amount of the financial asset or financial liability. The effective interest rate is calculated by taking into account any discount or premium on acquisition, fees and cost that are integral part of effective interest rate. Further, the Foundation estimates cash flows by considering all contractual terms of the financial instruments.

Once the recorded value of a financial asset or group of similar financial assets has been reduced due to an impairment loss, interest income continues to be recognized using the original effective interest rate used to discount the future recoverable cash flows.

(b) *Interest* – Interest income from cash in banks is recognized as interest accrues taking into account the effective yield of the asset.

Costs and expenses are recognized in profit or loss upon utilization of the goods and/or services or at the date they are incurred. Any finance costs are reported in profit or loss on an accrual basis, except any borrowing costs that relates to a qualifying asset which is capitalized as part of the cost of the asset (see Note 2.12).

2.10 Leases – Foundation as Lessee

Leases, which do not transfer to the Foundation substantially all the risks and benefits incidental to ownership of the leased asset, are classified as operating leases. Operating lease payments (net of any incentive received from the lessor) are recognized as expense in profit or loss on a straight-line basis over the lease term. Associated costs, such as repairs and maintenance and insurance, are expensed as incurred.

The Foundation determines whether an arrangement is, or contains, a lease based on the substance of the arrangement. It makes an assessment of whether the fulfillment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset.

2.11 Employee Benefits

The Foundation provides post-employment benefits to employees through a defined benefit plan, defined contribution plans, and other employee benefits which are recognized as follows:

(a) Post-employment Defined Benefit Plan

A defined benefit plan is a post-employment plan that defines an amount of post-employment benefit that an employee will receive on retirement, usually dependent on one or more factors such as age, years of service and salary. The legal obligation for any benefits from this kind of post-employment plan remains with the Foundation, even if plan assets for funding the defined benefit plan have been acquired. The Foundation's defined benefit pension plan covers all regular full-time employees.

The liability recognized in the statement of financial position for a defined benefit plan solely pertains to the present value of the defined benefit obligation at the end of the reporting period. The defined benefit obligation is calculated annually by an independent actuary using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows for expected benefit payments using a discount rate derived from the interest rates of zero coupon government bonds as published by Bloomberg using its valuation technology, Bloomberg Valuation, that are denominated in the currency in which the benefits will be paid and that have terms to maturity approximating to the terms of the related post-employment liability.

Remeasurements, comprising of actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are reflected immediately in the statement of financial position with a charge or credit recognized in other comprehensive income in the period in which they arise. Interest expense is calculated by applying the discount rate at the beginning of the period, taking account of any changes in the net defined benefit liability during the period as a result of benefit payments. Interest expense is reported as part of Finance costs under the Project Costs account in the statement of comprehensive income. Past-service costs are recognized immediately in profit or loss in the period of a plan amendment or curtailment.

(b) *Post-employment Defined Contribution Plans*

A defined contribution plan is a post-employment plan under which the Foundation pays fixed contributions into an independent entity (such as the Social Security System). The Foundation has no legal or constructive obligations to pay further contributions after payment of the fixed contribution. The contributions recognized in respect of defined contribution plans are expensed as they fall due. Liabilities or assets may be recognized if underpayment or prepayment has occurred and are normally of a short-term nature.

(c) *Termination Benefits*

Termination benefits are payable when employment is terminated by the Foundation before the normal retirement date, or whenever an employee accepts voluntary redundancy in exchange for these benefits. The Foundation recognizes termination benefits at the earlier of when it can no longer withdraw the offer of such benefits and when it recognizes costs for a restructuring that is within the scope of PAS 37, *Provisions, Contingent Liabilities and Contingent Assets*, and involves the payment of termination benefits. In the case of an offer made to encourage voluntary redundancy, the termination benefits are measured based on the number of employees expected to accept the offer. Benefits falling due more than 12 months after the end of each reporting period are discounted to their present value.

(d) *Compensated Absences*

Compensated absences are recognized for the number of paid leave days (including holiday entitlement) remaining at the end of the reporting period. They are included in Other Liabilities account in the statement of financial position at the undiscounted amount that the Foundation expects to pay as a result of the unused entitlement.

2.12 Borrowing Costs

Borrowing costs are recognized as expenses in the period in which they are incurred, except to the extent that they are capitalized. Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset (i.e., an asset that takes a substantial period of time to get ready for its intended use or sale) are capitalized as part of cost of such asset. The capitalization of borrowing costs commences when expenditures for the asset and borrowing costs are being incurred and activities that are necessary to prepare the asset for its intended use or sale are in progress. Capitalization ceases when substantially all such activities are complete.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization.

2.13 Fund Balance

Grants and contributions represent the initial contribution received by the Foundation at the start of its operations.

Cumulative results of operations represent all current and prior period results of operations as reported in the profit or loss section of the statement of comprehensive income. Consistent with the Foundation's registered activities, all of these are flowed back into its operations.

Remeasurement of post-employment defined benefit plan pertains to the net cumulative actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions used in the determination of the post-employment defined benefit obligation.

2.14 Related Party Relationships and Transactions

Related party transactions are transfers of resources, services or obligations between the Foundation and its related parties, regardless whether a price is charged.

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial and operating decisions. These parties include: (a) individuals owning, directly or indirectly through one or more intermediaries, control or are controlled by, or under common control with the Foundation; (b) associates; and, (c) individuals owning, directly or indirectly, an interest in the voting power of the Foundation that gives them significant influence over the Foundation and close members of the family of any such individual.

In considering each possible related party relationship, attention is directed to the substance of the relationship and not merely on the legal form.

2.15 Events after the End of the Reporting Period

Any post-year-end event that provides additional information about the Foundation's statement of financial position at the end of the reporting period (adjusting event) is reflected in the financial statements. Post-year-end events that are not adjusting events, if any, are disclosed when material to the financial statements.

3. SIGNIFICANT ACCOUNTING JUDGMENTS AND ESTIMATES

The preparation of the Foundation's financial statements in accordance with PFRS requires management to make judgments and estimates that affect the amounts reported in the financial statements and related notes. Judgments and estimates are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Actual results may ultimately differ from these estimates.

3.1 Critical Management Judgments in Applying Accounting Policies

In the process of applying the Foundation's accounting policies, management has made the following judgments, apart from those involving estimation, which have the most significant effect on the amounts recognized in the financial estimates:

(a) Determination of ECL on Loans Receivable (2018)

The Foundation applies the general approach in measuring the ECL for loans receivables.

To measure the ECL, the expected loss rates were calculated over a period of three years before December 31, 2018 or January 1, 2018, respectively, and the corresponding historical credit losses experienced within such period. The historical loss rates are adjusted to reflect current and forward-looking information on macroeconomic factors affecting the ability of the counterparties to settle the receivables. The Foundation has identified the customer price index to be the most relevant factor, and accordingly adjusts the historical loss rates based in expected changes in this factor.

The Foundation's management intends to regularly calibrate (i.e., on an annual basis) the rate to consider the historical credit loss experience with forward-looking information (i.e., forecast economic conditions). Details about the ECL on the Foundation's loans receivable is disclosed in Note 4.1.

(b) Evaluation of Business Model Applied in Managing Financial Instruments (2018)

Upon adoption of PFRS 9, the Foundation developed business models, which reflect how it manages its portfolio of financial instruments. The Foundation's business models need not be assessed at entity level or as a whole but shall be applied at the level of a portfolio of financial instruments (i.e., group of financial instruments that are managed together by the Foundation) and not on an instrument-by-instrument basis (i.e., not based on intention or specific characteristics of individual financial instrument).

In determining the classification of a financial instrument under PFRS 9, the Foundation evaluates in which business model a financial instrument or a portfolio of financial instruments belong to taking into consideration the objectives of each business model established by the Foundation (e.g., generating accrual income, direct matching to a specific liability) as those relate to the Foundation's trading strategies.

(c) Testing the Cash Flow Characteristics of Financial Assets and Continuing Evaluation of the Business Model (2018)

In determining the classification of financial assets under PFRS 9, the Foundation assesses whether the contractual terms of the financial assets give rise on specified dates to cash flows that are SPPI on the principal outstanding, with interest representing time value of money and credit risk associated with the principal amount outstanding. The assessment as to whether the cash flows meet the test is made in the currency in which the financial asset is denominated. Any other contractual term that changes the timing or amount of cash flows (unless it is a variable interest rate that represents time value of money and credit risk) does not meet the amortized cost criteria. In cases where the relationship between the passage of time and the interest rate of the financial instrument may be imperfect, known as modified time value of money, the Foundation assesses the modified time value of money feature to determine whether the financial instrument still meets the SPPI criterion. The objective of the assessment is to determine how different the undiscounted contractual cash flows could be from the undiscounted cash flows that would arise if the time value of money element was not modified (the benchmark cash flows). If the resulting difference is significant, the SPPI criterion is not met. In view of this, the Foundation considers the effect of the modified time value of money element in each reporting period and cumulatively over the life of the financial instrument.

In addition, PFRS 9 emphasized that if more than an infrequent sale is made out of a portfolio of financial assets carried at amortized cost, an entity should assess whether and how such sales are consistent with the objective of collecting contractual cash flows.

(d) Distinction between Operating and Finance Leases

The Foundation has entered into various lease agreements as a lessee. Critical judgment was exercised by management to distinguish each lease agreement as either an operating or finance lease by looking at the transfer or retention of significant risk and rewards of ownership of the properties covered by the agreements. Failure to make the right judgment will result in either overstatement or understatement of assets and liabilities.

Management has assessed that its existing lease agreements qualify as operating leases.

(e) Recognition of Provisions and Contingencies

Judgment is exercised by management to distinguish between provisions and contingencies. Policies on recognition of provisions and contingencies are discussed in Note 2.8 and relevant disclosures are presented in Note 18.

3.2 Key Sources of Estimation Uncertainty

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting periods, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next reporting period:

(a) Estimation of Allowance for ECL (2018)

The measurement of the allowance for ECL on financial assets at amortized cost is an area that requires the use of significant assumptions about the future economic conditions and credit behavior (e.g., likelihood of members and other counterparties defaulting and the resulting losses). Explanation of the inputs, assumptions and estimation used in measuring ECL is further detailed in Note 4.1.

The methodology and assumptions used in estimating ECL allowance are reviewed regularly by the Foundation to reduce any differences between loss estimates and actual loss experience.

The carrying value of loans and other receivables and rental deposits and the analysis of allowance for impairment on such financial assets are shown in Notes 4.1, 7, and 18.

(b) *Impairment of Loans and Other Receivables and Rental Deposits (2017)*

Adequate amount of allowance for impairment is provided for specific and groups of accounts, where objective evidence of impairment exists. The Foundation evaluates the amount of allowance for impairment based on available facts and circumstances affecting the collectability of the accounts, including, but not limited to, the length of the Foundation's relationship with the members and other counterparties, the members' and other counterparties' current credit status, average age of accounts, collection experience and historical loss experience. The methodology and assumptions used in estimating future cash flows are reviewed regularly by the Foundation to reduce any differences between loss estimates and actual loss experience.

(c) *Estimation of Useful Lives of Property and Equipment*

The Foundation estimates the useful lives of property and equipment based on the period over which the assets are expected to be available for use. The estimated useful lives of property and equipment are reviewed periodically and are updated if expectations differ from previous estimates due to physical wear and tear, technical or commercial obsolescence and legal or other limits on the use of the assets.

The carrying amounts of property and equipment are analyzed in Note 8. Based on management's assessment as of December 31, 2018 and 2017, there is no change in estimated useful lives of property and equipment during those years. Actual results, however, may vary due to changes in estimates brought about by changes in factors mentioned in the preceding page.

(d) *Impairment of Property and Equipment*

The Foundation's policy on estimating the impairment of property and equipment is discussed in detail in Note 2.5. Though management believes that the assumptions used in the estimation of the carrying amount of the assets are appropriate and reasonable, significant changes in these assumptions may materially affect the assessment of recoverable amount and any resulting impairment loss could have a material adverse effect on the results of operations.

Management has assessed that there are no indications of impairment on the Foundation's property and equipment at the end of each reporting period; hence, no impairment losses are required to be recognized on those assets in any of the reporting periods.

(e) *Valuation of Post-employment Defined Benefit Obligation*

The determination of the Foundation's obligation and cost of post-employment defined benefit is dependent on the selection of certain assumptions used by an independent actuary in calculating such amounts. Those assumptions include, among others, discount rates and salary rate increase. A significant change in any of these actuarial assumptions may generally affect the recognized expense, other comprehensive income or losses and the carrying amount of the post-employment benefit obligation in the next reporting period.

The amounts of post-employment benefit obligation and expense and an analysis of the movements in the estimated present value of post-employment benefit obligation, as well as the analysis of the sensitivity of such obligation to the changes in significant assumptions are presented in Note 14.2.

4. RISK MANAGEMENT OBJECTIVES AND POLICIES

The Foundation is exposed to certain financial risks in relation to financial instruments. The Foundation's financial assets and liabilities by category are summarized in Note 5. The main types of risks are credit risk and liquidity risk.

The Foundation's risk management is coordinated with its BOT, and focuses on actively securing the Foundation's short-to-medium term cash flows by minimizing the exposure to financial markets.

The Foundation does not engage in the trading of financial assets for speculative purposes nor does it write options.

The most significant financial risks to which the Foundation is exposed to are described in the succeeding sections.

4.1 Credit Risk

Credit risk is the risk that a counterparty may fail to discharge an obligation to the Foundation. The Foundation is exposed to this risk for financial instruments arising from granting loans and advances to its members and its employees, security deposit to lessors and placing deposits to various local banks.

The Foundation continuously monitors default of its members and other counterparties, identified either individually or by group, and incorporates the information into its credit risk controls. The Foundation's policy is to deal only with creditworthy counterparties.

The maximum credit risk exposure of financial assets is the carrying amount of the financial assets as shown in the statements of financial position or in the detailed analysis provided in the notes to the financial statements, as summarized below.

	Notes	**2018**	2017
Cash	6	**P 1,689,187,884**	P 835,183,098
Loans receivable - net	7	**16,777,082,727**	12,768,096,012
Other receivables	7	**114,789,788**	175,602,774
Rental deposits	18	**34,593,987**	27,248,830
		P18,615,654,386	P13,806,130,714

(a) Cash

The credit risk for cash is considered negligible, since the counterparties are reputable banks with high quality external credit ratings. Cash in banks are insured by the Philippine Deposit Insurance Corporation up to a maximum coverage of P0.5 million for every depositor per banking institution.

(b) Loans and Other Receivables and Rental Deposits

The Foundation's policy is to perform an assessment at the end of each reporting period, whether a financial instrument's credit risk has increased significantly since initial recognition. The Foundation considers the change in the risk of default occurring over the remaining life of the financial instrument. In accordance with the Foundation's policy, a debt instrument is assessed for impairment based on the following stages:

Stage 1 : When a debt instrument is first recognized, the Foundation recognizes credit losses based on the twelve-month ECLs. Stage 1 debt security also includes facilities where the credit risk has improved and security has been reclassified from Stage 2.

Stage 2 : When a debt instrument has shown a significant increase in credit risk since origination, the Foundation recognizes an allowance for the lifetime ECL. Stage 2 debt instruments also includes facilities where the credit risk has improved and the instrument has been reclassified from Stage 3.

Stage 3: When a debt instrument is considered as credit impaired, the Foundation recognizes an allowance for the lifetime ECL.

Based on historical information about the members default rates, management have determined that any loan with one day past due is considered to pose a significant increase in credit risk. Therefore, all loans that are past due are considered to be under Stage 2, wherein lifetime ECL is applied.

The key elements used in the calculation of ECL are as follows:

- *Probability of Default (PD)* – is an estimate of likelihood of default over a given time horizon. A default may only happen at a certain time over the assessed period, if the instrument has not been previously derecognized and is still in the portfolio.

- *Loss Given Default (LGD)* – is an estimate of loss arising in case where a default occurs at a given time. It is based on the difference between the contractual cash flows of a financial instrument due from a counterparty and those that the Foundation would expect to receive, including the realization of any collateral.

- *Exposure at Default (EAD)* – represents the gross carrying amount of the financial instruments subject to the impairment calculation.

The ECL is determined by projecting the PD, LGD, and EAD for each future period and for each collective segment. These three components are multiplied together and adjusted for the likelihood of survival (i.e., the exposure has not prepaid or defaulted in an earlier month). The lifetime PD is developed by applying a maturity profile to the 12-month PD. The maturity profile looks at how defaults develop on a portfolio from the point of initial recognition through the lifetime of the loans. The maturity profile is based on historical observed data and is assumed to be the same across all assets within the portfolio. This is supported by historical analysis. The 12-month and lifetime PDs are determined based on the expected payment profile of the members.

The calculation of ECL incorporates forward-looking information. The Foundation has performed historical analysis and identified the key economic value factor affecting credit risk and ECL for the loan portfolio.

The loans receivable are secured by the microsavings contributions of all active members, and the Foundation is not exposed to any significant credit risk exposure to any single counterparty. Significant portion of the Foundation's loans receivable pertains to claims from various groups of members with similar characteristics. However, the Foundation has no experience of significant members' default and historical losses from any single group of counterparties.

Based on the ECL model of PFRS 9, the Foundation provides an allowance for impairment in 2018 on stage 1, 12-month ECL, and stage 2, lifetime ECL, loans receivable amounting to P879.6 million and P3.4 million, respectively. Further, in 2017, the ECL on stage 1, 12-month ECL, and stage 2, lifetime ECL, loans receivable amounted to P669.6 million and P2.4 million, respectively. The impairment loss on ECL is presented as Impairment loss, under Project Cost account (see Notes 7.1 and 13).

The ECL on other receivables mainly pertain to loans and advances granted to the Foundation's employees which are collected through salary deduction. Thus, considered to be fully recoverable based on the management's assessment (see Note 7.2).

4.2 Liquidity Risk

The Foundation manages its liquidity needs by carefully monitoring scheduled debt servicing payments for long-term financial liabilities as well as cash outflows due in a day-to-day business. Liquidity needs are monitored in various time bands, on a day-to-day and week-to-week basis, as well as on the basis of a rolling 30-day projection. Long-term liquidity needs for a six-month and one-year period are identified monthly.

The Foundation maintains cash to meet its liquidity requirements for up to 30-day periods. Funding for long-term liquidity needs is additionally secured by an adequate amount of committed credit facilities and the ability to consistently maintain an effective collection turn-over. As of December 31, 2018 and 2017, portfolio at risk is 0.38% and 0.36%, respectively.

As at December 31, 2018, the Foundation's financial liabilities have contractual maturities which are presented below.

	Notes	Within 6 months	Within 12 months	After one year but within five years	Total
Microsavings	9	P 9,126,462,665	P -	P -	P 9,126,462,665
Loans payable	10	492,912,817	316,740,700	1,304,214,067	2,113,867,584
Other liabilities	11	945,570,756	-	-	945,570,756
		P 10,564,946,238	P 316,740,700	P 1,304,214,067	P 12,185,901,005

This compares to the maturity of the Foundation's financial liabilities as of December 31, 2017 as follows:

	Notes	Within 6 months	Within 12 months	After one year but within five years	Total
Microsavings	9	P 6,979,171,061	P -	P -	P 6,979,171,061
Loans payable	10	431,610,175	441,197,200	983,106,983	1,855,914,358
Other liabilities	11	1,170,053,849	-	-	1,170,053,849
		P 8,580,835,085	P 441,197,200	P 983,106,983	P10,005,139,268

The above contractual maturities reflect the gross cash flows, which may differ from the carrying values of the liabilities at the end of the reporting periods.

5. CATEGORIES AND OFFSETTING OF FINANCIAL ASSETS AND FINANCIAL LIABILITIES

5.1 Carrying Amounts and Fair Values by Category

The carrying amounts and fair values of financial assets and financial liabilities at amortized cost presented in the statements of financial position are shown below and in the succeeding page (amounts in thousands).

		2018		2017	
	Notes	Carrying Values	Fair Values	Carrying Values	Fair Values
Financial Assets					
Cash	6	P 1,689,188	P 1,689,188	P 835,183	P 835,183
Loans receivable - net	7	16,777,083	16,777,083	12,768,096	12,768,096
Other receivables	7	114,790	114,790	175,603	175,603
Rental deposits	18	34,594	34,594	27,249	27,249
		P 18,615,655	P 18,615,655	P 13,806,131	P 13,806,131
Financial Liabilities					
Microsavings	9	P 8,858,154	P 8,858,154	P 6,775,177	P 6,775,177
Loans payable	10	1,934,000	1,934,000	1,700,000	1,700,000
Other liabilities	11	945,571	945,571	1,170,054	1,170,054
		P 11,737,725	P 11,737,725	P 9,645,231	P 9,645,231

Management considers that the carrying amount of the Foundation's financial assets and financial liabilities measured at amortized cost approximates the fair values due to its short term duration.

5.2 Fair Value Hierarchy

In accordance with PFRS 13, *Fair Value Measurements,* the fair values of financial assets and financial liabilities and non-financial assets which are measured at fair value on a recurring or non-recurring basis and those assets and liabilities not measured at fair value but for which fair values are disclosed in accordance with other relevant PFRS, are categorized into three levels based on the significance of inputs used to measure the fair value. The fair value hierarchy has the following levels:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities that an entity can access at the measurement date;
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and,

- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The level within which the asset or liability is classified is determined based on the lowest level of significant input to the fair value measurement.

For purposes of determining the market value at Level 1, a market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis.

For financial assets and financial liabilities measured at amortized cost, management considers that their carrying amounts approximate or equal to their fair values. Based on management review of its financial instruments measured at amortized cost, except for cash which is considered Level 1, all the rest are determined to be Level 3 in the fair value hierarchy.

5.3 Offsetting of Financial Assets and Financial Liabilities

As of December 31, 2018 and 2017, the loans receivable and the related microsavings and the loans payable and the related loans receivable assigned as security for the loans payable are subject to offsetting, enforceable master netting arrangements and similar agreements. Each agreement between the Foundation and counterparties allows for net settlement of the relevant financial assets and financial liabilities when both elect to settle on a net basis. In the absence of such an election, financial assets and financial liabilities will be settled on a gross basis, however, each party to the master netting agreement or similar agreement will have the option to settle all such amounts on a net basis in the event of default of the other party.

6. CASH

The Foundation's cash in bank balance as of December 31, 2018 and 2017 amounted to P1,689.2 million and P835.2 million, respectively. Cash in banks generally earn interest at rates based on daily bank deposit rates.

Interest earned from cash in banks amounted to P15.6 million and P5.3 million in 2018 and 2017, respectively, and is presented as part of Other Revenues account in the statements of comprehensive income (see Note 12).

None of the Foundation's savings deposits were held as security for any of the Foundation's liabilities at the end of the reporting periods.

7. LOANS AND OTHER RECEIVABLES

These accounts include the following:

7.1 Loans Receivable

Loans receivable consist of following as at December 31:

	2018	2017
Loans receivable	**P19,496,171,500**	P14,842,479,850
Unearned service charges	**(1,836,084,373)**	(1,402,378,738)
	17,660,087,127	13,440,101,112
Allowance for impairment	**(883,004,400)**	(672,005,100)
	P16,777,082,727	P12,768,096,012

As of December 31, 2018 and 2017, the Foundation has 1,753,871 and 1,532,695 active members, respectively.

Loans receivable represent microfinance loans granted to the Foundation's members. These loans have terms of six months and are partially secured by the respective carrying amounts of microsavings of individual members (see Note 9). These loans are subject to a nominal rate of 15% service charge all throughout the six-month term. On April 25, 2017, the BOT approved the reduction of the service charge to 12.5%. The service fees earned from these loans amounted to P6,283.9 million and P4,866.8 million in 2018 and 2017, respectively, and are shown as part of Service Fees in the statements of comprehensive income.

Starting 2018, the Foundation charged 0.5% of every principal amount of loan released to each member. The service fee earned from these transactions amounted to P278.4 million in 2018, and are shown as part of Service Fees in the 2018 statement of comprehensive income.

Loans receivable have been reviewed for indications of impairment. Certain receivables were found to be impaired; hence, adequate amount of allowance for impairment has been recognized accordingly (see Note 4.1).

A reconciliation of the allowance for impairment at the beginning and end of 2018 and 2017 is shown below.

	Note	2018	2017
Balance at beginning of year		**P 672,005,100**	P 442,019,300
Impairment loss during the year	13	**350,464,480**	286,680,802
Write-off of receivables previously provided with allowance		**(139,465,180)**	(56,695,002)
Balance at end of year		**P 883,004,400**	P 672,005,100

Loans receivable written-off in 2018 and 2017 pertain to the outstanding balance of loans granted to 22,446 and 10,689 members or 1.3% and 0.7% of active members, respectively.

Certain loans receivable of the Foundation amounting to P446.3 million and P605.4 million as of December 31, 2018 and 2017, respectively, were assigned with recourse to a local bank as security to the Foundation's borrowings from these local banks as discussed in detail in Note 10.

7.2 Other Receivables

Other receivables consist of personal and mobility loans, and noninterest-bearing advances granted to the Foundation's personnel with total carrying amount of P114.8 million and P175.6 million as of December 31, 2018 and 2017, respectively.

Standard service fees of 5% for personal loans and 10% for motorcycle loans are charged in both of the reporting periods and are recognized as service charges on employee loans under Other Revenues account in the statements of comprehensive income (see Note 12). These loans are paid by employees every pay period through salary deductions.

As of December 31, 2018 and 2017, other receivables were reviewed for indications of impairment and none is considered impaired (see Note 4.1).

8. PROPERTY AND EQUIPMENT

The gross carrying amounts and accumulated depreciation and amortization of property and equipment at the beginning and end of 2018 and 2017 are shown below.

	Building and Office Improvements	Furniture and Fixtures	Equipment and Vehicles	Total
December 31, 2018				
Cost	P 65,678,584	P 289,884,044	P 35,071,028	P 390,633,656
Accumulated depreciation and amortization	(19,865,483)	(195,337,495)	(21,779,128)	(236,982,106)
Net carrying amount	**P 45,813,101**	**P 94,546,549**	**P 13,291,900**	**P 153,651,550**
December 31, 2017				
Cost	P 65,678,584	P 217,158,377	P 32,788,853	P 315,625,814
Accumulated depreciation and amortization	(15,486,901)	(149,076,701)	(16,562,012)	(181,125,614)
Net carrying amount	P 50,191,683	P 68,081,676	P 16,226,841	P 134,500,200
January 1, 2017				
Cost	P 65,678,584	P 167,013,410	P 26,984,553	P 259,676,547
Accumulated depreciation and amortization	(11,108,329)	(109,525,429)	(11,459,989)	(132,093,747)
Net carrying amount	P 54,570,255	P 57,487,981	P 15,524,564	P 127,582,800

A reconciliation of the carrying amounts of property and equipment at the beginning and end of 2018 and 2017 is shown below.

	Building and Office Improvements	Furniture and Fixtures	Equipment and Vehicles	Total
Balance at January 1, 2018, net of accumulated depreciation and amortization	P 50,191,683	P 68,081,676	P 16,226,841	P 134,500,200
Additions	-	72,725,667	2,282,175	75,007,842
Depreciation and amortization charges for the year	(4,378,582)	(46,260,794)	(5,217,116)	(55,856,492)
Balance at December 31, 2018, net of accumulated depreciation and amortization	**P 45,813,101**	**P 94,546,549**	**P 13,291,900**	**P 153,651,550**
Balance at January 1, 2017, net of accumulated depreciation and amortization	P 54,570,255	P 57,487,981	P 15,524,564	P 127,582,800
Additions	-	50,144,967	5,804,300	55,949,267
Depreciation and amortization charges for the year	(4,378,572)	(39,551,272)	(5,102,023)	(49,031,867)
Balance at December 31, 2017, net of accumulated depreciation and amortization	P 50,191,683	P 68,081,676	P 16,226,841	P 134,500,200

The amount of depreciation and amortization is allocated and reported in the statements of comprehensive income as follows (see Note 13):

	2018	2017
Project costs	**P 43,719,133**	P 35,772,986
General and administrative expenses	**12,137,359**	13,258,881
	P 55,856,492	P 49,031,867

9. MICROSAVINGS

This account is broken down as follows:

	2018	2017
CBU	**P 7,665,968,749**	P 5,828,407,209
LCBU	**1,192,185,010**	946,769,600
	P 8,858,153,759	P 6,775,176,809

The collected CBU and LCBU or microsavings is for purposes of maintaining a compensating balance, which is used to offset against the member's outstanding loan balance in case of default (see Note 7). Historically, default rates for the last three years have not exceeded 1% of the carrying balance of loans receivable as at the reporting periods.

CBU pertains to weekly savings of P50 or more, that each member maintain during the first loan cycle, which earns rebates of up to 7% per annum. On the succeeding loan cycles, the members have to maintain a balance equivalent to at least 15% of the availed principal loan. Rebates are computed and released to clients at the end of December every year.

LCBU is a mandatory noninterest bearing, alternative savings that is locked in as to member withdrawal. The weekly contribution is fixed at P10. When the LCBU reaches P2,400, 50% of such is transferred to CBU. It can only be withdrawn in full by the member upon termination of membership from the Foundation.

All active members of the Foundation are required to maintain their microsavings contributions based on prescribed minimum levels.

10. LOANS PAYABLE

The composition of the Foundation's outstanding bank loans is shown below.

	2018	2017
Current	**P 715,000,000**	P 476,000,000
Non-current	**1,219,000,000**	1,224,000,000
	P1,934,000,000	P1,700,000,000

To enable the Foundation to provide uninterrupted microfinance loans to members in accordance with the Foundation's microfinance program, the Foundation, as part of its cash management, obtains financing through bank loans from various financial institutions and/or organization.

As approved by the BOT on November 17, 2016, the Foundation entered into a Facility Agreement (the Agreement) as corporate notes issuer, with three local universal banks as initial noteholders, Credit Guarantee & Investment Facility (a trust fund of the Asian Development Bank) as guarantor, and BPI Capital Corporation as mandated lead arranger and bookrunner. Based on the Agreement, which was signed on January 26, 2017, the initial noteholders grant to the Foundation a loan facility with a maximum principal amount of P2.0 billion, subject to release in not more than three tranches starting February 2017 to January 2018. As of December 31, 2018, the Foundation has fully drawn the P2.0 billion. The net proceeds of the note issuance is used by the Foundation in financing its expansion plans, paying off existing bank loans, and for other general corporate purposes.

In addition, the initial noteholders require the Foundation to maintain the following ratios: operational self-sufficiency ratio of more than 110%, portfolio at risk of less than 1.5%, equity to gross loan portfolio of more than 15%, net loan portfolio as percentage of assets of more than 80% and a debt to equity ratio of less than 190%. As of December 31, 2018 and 2017, the Foundation is compliant with all the security requirements and covenants imposed by the respective creditors.

In 2018 and 2017, the Foundation obtained a short-term secured loans payable with a local bank amounting to P200.0 million in each year. As a security, certain loans receivable of the Foundation amounting to P446.3 million and P605.4 million as of December 31, 2018 and 2017, respectively, were assigned to the creditor with recourse (see Note 7.1).

A summary of the terms and conditions of each loan as at December 31, 2018 and 2017 is presented below:

Outstanding Principal Balance 2018	Outstanding Principal Balance 2017	Interest Rate	Security	Maturity date
P 790,000,000	P1,000,000,000	Fixed at 5.07%	Unsecured	2022
434,000,000	500,000,000	Fixed at 5.17%	Unsecured	2022
-	200,000,000	Fixed at 4.5%	Secured, assigned receivables P605.4 million	2018
10,000,000	-	Nil	Unsecured	2019
200,000,000	-	Fixed at 5%	Secured, assigned receivables P446.3 million	2019
500,000,000	-	Fixed at 5.9%	Unsecured	2023
P 1,934,000,000	P1,700,000,000			

The P10.0 million, with 0% interest loan pertains to borrowings from Restart Micro Enterprise, Inc., a non-stock corporation who implemented a rehabilitation program for Marawi victims. Said entity extended a loan to the Foundation to be used by the latter to provide loans to its clients affected in Marawi at an interest rate of 4% only to cover its operational costs. In line with said condition, the parties agreed that the loan shall have an interest rate of 0% and 12 months repayment terms.

Interest expense on interest-bearing loans amounted to P111.6 million and P77.3 million in 2018 and 2017, respectively, and is presented as part of Finance costs under Project Costs in the statements of comprehensive income (see Note 13). Unpaid interests as at December 31, 2018 and 2017 amounting to P5.7 million and P3.9 million, respectively, are presented as part of Accrued expenses under the Other Liabilities in the statements of financial position (see Note 11).

The changes in Loans Payable account in 2018 and 2017 are shown below.

	2018	2017
Balance at beginning of year	**P1,700,000,000**	P 770,000,000
Additional loans payable	**710,000,000**	1,700,000,000
Repayments of loans payable	**(476,000,000)**	(770,000,000)
Balance at end of year	**P1,934,000,000**	P1,700,000,000

11. OTHER LIABILITIES

This account includes the following:

	Note	2018	2017
Beneficiary program and support trust fund (BPSTF)		**P 352,060,278**	P 715,747,780
Accrued expenses	10	**268,312,387**	212,500,641
Staff benevolent fund		**254,671,200**	203,949,400
Accounts payable		**129,507,093**	70,566,770
		P1,004,550,958	P1,202,764,591

BPSTF represents the cumulative trust fund set aside to cover the payment of a loan in case of death of a member, death benefits, health-care program, hospitalization benefits, scholarship to the children of the qualified members, and provision for distribution relief goods and other livelihood support intervention in time of calamities such as typhoon, fires, earthquakes and floods. Further, this is also used to cover losses in case of robbery and hold-up of loan officers while exercising efforts of collection from members. Furthermore, BPSTF is also utilized by the Foundation for its numerous corporate social responsibility activities that are conducted nationwide.

In 2018 and 2017, the total client community services charged to BPSTF amounted to P363.7 million and 175.3 million, respectively.

Staff benevolent fund includes amounts set aside for employee hospitalization, employee death aid, and employee welfare and benefits.

Accrued expenses include accruals for interest expense and various expenses for the operations of the Foundation such as light and water, postage and telephone, travel and reimbursable expenses and repairs and maintenance.

Accounts payable include gross receipts and withholding taxes payable, and unclaimed benefits of resigned personnel during the reporting periods.

12. OTHER REVENUES

This account includes the following:

	Notes	2018	2017
Membership contribution		**P 55,324,550**	P -
Service charges on employee loans	7.2	**16,385,260**	17,101,223
Interest income from bank deposits	6	**15,609,356**	5,312,714
Gain from recovery of written-off accounts		**5,510,965**	1,448,565
		P 92,830,131	P 23,862,502

In 2018, each new group member of the Foundation is required to contribute P50. The contributions is used by the Foundation to cover administrative fee and supplies cost, presented as part of Project Costs in the 2018 statement of comprehensive income (see Note 13).

13. EXPENSES

Details of expenses by nature are shown below.

	Notes	2018	2017
Employee benefits	14.1, 15	**P 2,189,435,498**	P 1,917,017,085
Travel and transportation		**509,840,328**	441,617,600
Impairment loss	7.1	**350,464,480**	286,680,802
Office rental	18	**165,778,057**	131,951,751
Taxes and licenses	19(f)	**163,940,885**	128,515,011
Interest expense	10, 14.2	**146,944,016**	97,567,505
Repairs and maintenance		**126,154,683**	114,674,574
Office supplies and reproduction		**91,271,235**	74,538,772
Staff development and conference		**82,572,609**	62,418,025
Postage and telephone		**65,929,739**	54,002,444
Depreciation and amortization	8	**55,856,492**	49,031,867
Light and water		**40,853,721**	34,325,852
Grants and donations		**22,988,960**	22,547,650
Professional fees		**20,914,698**	32,078,607
Miscellaneous		**47,003,978**	24,555,707
		P 4,079,949,379	P 3,471,523,252

These expenses are classified and reported in the statements of comprehensive income as follows:

	2018	2017
Project costs	**P3,445,853,793**	P 2,901,495,509
General and administrative expenses	**634,095,586**	570,027,743
	P4,079,949,379	P 3,471,523,252

Project costs are broken down as follows:

	Notes	2018	2017
Employee benefits	14.1, 15	**P1,900,202,208**	P1,654,677,115

14. EMPLOYEE BENEFITS

14.1 Salaries and Employee Benefits Expense

Expenses recognized for salaries and other employee benefits are presented below.

	Notes	2018	2017
Salaries and wages		**P1,846,363,332**	P1,551,133,898
Post-employment benefits	14.2	**136,261,038**	192,371,900
SSS, HDMF, Philhealth contributions		**144,839,928**	112,704,787
Staff benevolent fund		**61,971,200**	60,806,500
	13	**P2,189,435,498**	P1,917,017,085

The amounts of employee benefits are allocated and reported in the statements of comprehensive income as follows (see Note 13):

	2018	2017
Project costs	**P1,900,202,208**	P 1,654,677,115
General and administrative expenses	**289,233,290**	262,339,970
	P2,189,435,498	P 1,917,017,085

14.2 Post-employment Defined Benefit Plan

(a) *Characteristics of the Defined Benefit Plan*

The Foundation maintains an unfunded and noncontributory post-employment defined benefit plan covering all regular full-time employees. The Foundation does not have a formal, trusteed retirement plan.

In 2018, the anticipated retirement benefit set by management increased from 175% to 200% of the plan member's final monthly basic salary pay per year of service. Benefits are to be paid in lump sum, upon retirement or separation.

(b) *Explanation of Amounts Presented in the Financial Statements*

Actuarial valuations are made annually to update the post-employment benefit costs and obligation. All amounts presented in the succeeding pages are based on the actuarial valuation report obtained from an independent actuary in 2018 and 2017.

The movements in the present value of the post-employment defined benefit obligation recognized in the statements of financial position are as follows:

	2018	2017
Balance at beginning of year	**P 614,024,600**	P 377,214,100
Past service cost	**79,745,729**	87,717,780
Current service cost	**56,515,309**	104,654,120
Interest expense	**35,306,354**	20,294,100
Remeasurements - actuarial losses (gains) arising from changes in:		
Financial assumptions	**(152,729,020)**	(30,228,045)
Experience adjustments	**42,005,120**	54,372,545
Benefits paid	**(36,902,192)**	-
Balance at end of year	**P 637,965,900**	P 614,024,600

The components of amounts recognized in profit or loss and in other comprehensive income in respect of the post-employment defined benefit plan are as follows:

	2018	2017
Reported in profit or loss:		
Past service cost	**P 79,745,729**	P 87,717,780
Current service cost	**56,515,309**	104,654,120
Interest expense	**35,306,354**	20,294,100
	P 171,567,392	P 212,666,000
Reported in other comprehensive income (loss):		
Actuarial losses (gains) arising from changes in:		
Financial assumptions	**(P 152,729,020)**	(P 30,228,045)
Experience adjustments	**42,005,120**	54,372,545
	(P 110,723,900)	P 24,144,500

Retirement benefit expense is allocated and presented in the statements of comprehensive income under the following classification:

	2018	2017
Project costs	**P 95,382,727**	P 134,660,330
General and administrative expenses	**40,878,311**	57,711,570
	P 136,261,038	P 192,371,900

The interest expense on the obligation is included as part of Finance Costs under the Project Costs account in the statements of comprehensive income (see Note 13).

Amounts recognized in other comprehensive income or loss were included within item that will not be reclassified subsequently to profit or loss.

In determining the amounts of the post-employment defined benefit obligation, the following significant actuarial assumptions were used:

	2018	2017
Discount rates	**7.45%**	5.75%
Expected rate of salary increases	**12.0%**	12.0%

Assumptions regarding future mortality are based on published statistics and mortality tables. The average remaining working lives of an individual retiring at the age of 60 is 19 for both males and females. These assumptions were developed by management with the assistance of an independent actuary. Discount factors are determined close to the end of each reporting period by reference to the interest rates of a zero coupon government bond with terms to maturity approximating to the terms of the post-employment obligation. Other assumptions are based on current actuarial benchmarks and management's historical experience.

(c) Other information

The information on the sensitivity analysis for certain significant actuarial assumptions and the timing and uncertainty of future cash flows related to the retirement plan are described below.

(i) Sensitivity Analysis

The following table summarizes the effects of changes in the significant actuarial assumptions used in the determination of the post-employment defined benefit obligation as of December 31, 2018 and 2017:

	Impact on Post-employment Defined Benefit Obligation		
	Change in Assumption	**Increase in Assumption**	**Decrease in Assumption**
December 31, 2018			
Discount rate	**+/- 1.0%**	**(P 153,111,867)**	**P 204,149,000**
Salary growth rate	**+/- 1.0%**	**185,010,025**	**(146,732,209)**
December 31, 2017			
Discount rate	+/-1.0%	(P 146,037,607)	P 196,630,276
Salary growth rate	+/-1.0%	183,482,873	(140,814,486)

The above sensitivity analysis is based on a change in an assumption while holding all other assumptions constant. This analysis may not be representative of the actual change in the post-employment defined benefit obligation as it is unlikely that the change in assumptions would occur in isolation of one another as some of the assumptions may be correlated. Furthermore, in presenting the above sensitivity analysis, the present value of the post-employment defined benefit obligation at the end of the reporting period has been calculated using the projected unit credit method, which is the same as that applied in calculating the post-employment defined benefit obligation recognized in the statement of financial position.

The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the previous years.

(ii) Funding Arrangements and Expected Contribution

At the end of the reporting period, the Foundation has not yet established its funding plan for post-employment defined benefit obligation. While there are no minimum funding requirements in the country, the size of the underfunding may pose a cash flow risk in about ten years' time when a significant number of employees is expected to retire.

Within 10 years, the Foundation's undiscounted expected benefit payments from the plan amount to P23.9 million and P17.6 million at the end of 2018 and 2017 respectively.

As of December 31, 2018 and 2017, the weighted average duration of the post-employment defined benefit obligation at the end of the reporting period is six years.

15. RELATED PARTY TRANSACTIONS

The Foundation's related parties include its key management personnel and others as described in Note 2.14.

The compensation given to key management personnel in the form of short-term benefits amounted to P60.9 million and P50.9 million in 2018 and 2017, respectively; while post-employment benefits amounted to P28.9 million and P39.6 million in 2018 and 2017, respectively and is presented as part of Employee Benefits under Expenses in the statements of comprehensive income (see Note 13).

In 2016, the Foundation entered into a software implementation contract with Mr. Mehedi Tarafder, Chief Executive Officer of Jyosna Inc. and son of the president of the Foundation, for the development of a software needed by the Foundation to achieve full automation of its operation at its branch level, which include client management, loan tracking and collection of multiple loan services, reporting and consolidation of Financial Information System at central level. The contract with Jyosna Inc. satisfied the Foundation's policy on conflict of interest. The Information Technology expenses amounted to P15.3 million and P14.9 million in 2018 and 2017, respectively and is presented as part of Repairs and maintenance under Project Costs in the statements of comprehensive income (see Note 13).

16. TAXATION COVERAGE AND EXEMPTIONS

The Foundation is a nonstock, nonprofit corporation and the primary purpose of which is one of those enumerated in Section 30 of the Tax Reform Act of 1997 (R.A. No. 8424). No part of the excess of revenues over expenses of the Foundation inures to the benefit of any of its members, employees, key officers or board of trustees. The trustees do not receive any compensation, except for inconsequential honorarium to defray costs incurred in attending board meetings. In case of dissolution, the assets of the Foundation shall be transferred to a similar institution or to the government, in the absence of the former.

On November 3, 2015, R.A. No. 10693 otherwise known as the "*Microfinance NGOs Act*" (the Act) was signed into law. The Act provides that duly registered and microfinance NGOs shall be eligible to the preferential tax treatment of two percent (2%) based on its gross receipts from microfinance operations in lieu of all national taxes. In 2018 and 2017, the Foundation paid gross receipts tax (GRT) amounting to P132.8 million and P99.0 million, respectively, [see Note 19*(f)*]. Moreover, income derived by the Foundation from its properties, real or personal, or from any of its activities not covered by the exemption or activities conducted for profit regardless of the disposition made of such income, is subject to income tax.

17. FUND MANAGEMENT OBJECTIVES, POLICIES AND PROCEDURES

The Foundation's capital management objectives are to generate funds to expand its microfinance operations by collecting service fees at rates commensurate to the level of risk, to facilitate the convergence and provision of other social services to the poor, and to ensure the Foundation's sustainability to continue as a going concern.

The Foundation monitors funds on the basis of the carrying amount of the fund balance as presented in the statements of financial position.

The Foundation sets the amount of fund in proportion to its overall financing structure, i.e., fund balance and loans from third parties. The Foundation manages the fund structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets.

	2018	2017
Total loans from third parties	**P1,934,000,000**	P1,700,000,000
Total fund balance	**6,334,635,319**	3,648,664,914
External loans-to-fund ratio	**0.31:1.00**	0.47:1.00

The Foundation has satisfactorily complied with its covenant obligations related to its interest-bearing loans as of the end of each reporting periods as discussed in Note 10.

18. COMMITMENTS AND CONTINGENCIES

18.1 Operating Lease Commitments – Foundation as Lessee

The Foundation has operating lease agreements covering various office spaces occupied by the Foundation and its branches for a period of six months to two years. The lease agreements require the Foundation to pay rental deposits. Outstanding rental deposits as of December 31, 2018 and 2017 amounted to P34.6 million and P27.2 million, respectively, and are shown as Rental Deposits in the statements of financial position.

As of December 31, 2018 and 2017, future minimum lease payments under these non-cancellable operating leases within one year amounted to P165.8 million and P132.0 million, respectively.

Rent expense recognized related to these operating leases amounted to P165.8 million and P132.0 million in 2018 and 2017, respectively, which are allocated to both Project Costs and General and Administrative Expenses under Expenses section in statements of comprehensive income (see Note 13).

18.2 Others

There are other commitments and contingencies that arise in the normal course of the Foundation's operations which are not reflected in the financial statements. As of December 31, 2018 and 2017, management is of the opinion that losses, if any, that may arise from these commitments and contingencies will not have a material effect on the Foundation's financial statements.

19. SUPPLEMENTARY INFORMATION REQUIRED BY THE BUREAU OF INTERNAL REVENUE

Presented below and in the succeeding pages are the supplementary information which is required by the Bureau of Internal Revenue (BIR) under its existing revenue regulations to be disclosed as part of the notes to financial statements. This supplementary information is not a required disclosure under PFRS. All information are presented in their absolute amounts.

The information on taxes, duties and license fees paid or accrued during the taxable year required under Revenue Regulation No. 15-2010 are as follows:

(a) Output Value-added Tax (VAT)

The Foundation has not incurred any output tax liability for the year ended December 31, 2018 as it has no revenue transactions subject to VAT (see Note 16).

(b) Input VAT

The Foundation did not recognize any input VAT. It records all input VAT on purchases of goods and services as expense or part of cost of assets since it would not be recovered from setting-off with any output tax liability in the future.

(c) Documentary Stamp Tax

The Foundation paid documentary stamp tax (DST) in 2018 amounting to P4,790,099, which is related to the several loans originated during the year [see Note 19*(f)*].

(d) Taxes on Importation

The Foundation did not incur or pay any customs' duties and tariff fees as it did not have any importation for the year ended December 31, 2018.

(e) Excise Tax

The Foundation did not have any transactions in 2018, which are subject to excise tax.

(f) Taxes and licenses

Details of taxes and licenses in 2018 are shown below.

	Notes	
GRT	16	P 132,791,731
Licenses and permits		24,648,373
DST	19*(c)*	4,790,099
Local taxes		424,758
Real estate taxes		478,792
Other taxes		807,132
		P 163,940,885

The amounts of taxes and licenses are allocated and presented in the 2018 statement of comprehensive income as follows (see Note 13):

General and administrative expenses	P 139,021,561
Project costs	24,919,324
	P 163,940,885

(g) Withholding Taxes

Details of total withholding taxes for the year ended December 31, 2018 are shown below.

Compensation and employee benefits	P 23,818,086
Expanded	29,032,945
	P 52,851,031

The Foundation has no transactions subject to final withholding taxes during the year.

Report of Independent Auditors to Accompany Supplementary Information Required by the Philippine Securities and Exchange Commission Filed Separately from the Basic Financial Statements

Punongbayan & Araullo
20th Floor, Tower 1
The Enterprise Center
6766 Ayala Avenue
1200 Makati City
Philippines

T +63 2 988 2288

The Board of Trustees
ASA Philippines Foundation, Inc. (A Microfinance NGO)
(A Nonstock, Nonprofit Organization)
15th Floor Prestige Tower, F. Ortigas Jr. Street
Ortigas Center, Pasig City

We have audited, in accordance with Philippine Standards on Auditing, the financial statements of ASA Philippines Foundation, Inc. (A Microfinance NGO) for the year ended December 31, 2018, on which we have rendered our report dated February 28, 2019. Our audit was made for the purpose of forming an opinion on the basic financial statements taken as a whole. The Schedule of Philippine Financial Reporting Standards and Interpretations Adopted by the Securities and Exchange Commission and the Financial Reporting Standards Council as of December 31, 2018 is presented for purposes of additional analysis in compliance with the requirement under Securities Regulation Code Rule 68, as amended, and is not a required part of the basic financial statements prepared in accordance with Philippine Financial Reporting Standards. Such supplementary information is the responsibility of management. The supplementary information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.
